

Umaru Idris

Frontend Developer | IT Support

Nigeria | Phone: +234 9066006470 | Email: idrisumaru123@gmail.com | [Github](#) | [linkedin](#)

Professional Summary

Motivated and detail-oriented Frontend Developer with hands-on experience building responsive and user-friendly web applications using HTML, CSS, JavaScript, and React.js. Strong understanding of form validation, DOM manipulation, component-based architecture, and modern UI development practices. Experienced in using Git and GitHub for version control, collaboration, and maintaining clear project documentation.

Worked as a Frontend Developer with Amidarh AI Startup, contributing to the development of interactive user interfaces, implementing reusable React components, and collaborating with team members to improve application performance and user experience. Passionate about continuous learning, problem-solving, and growing within a professional software development environment.

Technical Skills

Frontend Technologies: HTML5, CSS3, JavaScript, FastAPI, MYSQL, REACT.js, Typescript

Tools & Platforms: Git, GitHub, VS Code, Chrome DevTools

Projects

University Campus Booking Clinic App with Chatbot

- Developed a full-stack campus clinic booking application for students to schedule appointments online.
- Integrated a chatbot to assist users with booking queries and FAQs.
- Built using HTML, CSS, JavaScript for the frontend and **Firebase** for backend services, including real-time database and authentication.
- Implemented form validation, booking notifications, and an intuitive booking management system.

Password Strength Checker

- Developed a web-based password strength checker using HTML, CSS, and JavaScript.
- Implemented real-time password validation based on length, uppercase letters, lowercase letters, numbers, and special characters.
- Added a show/hide password feature to improve usability.
- Provided visual feedback through a strength meter and a password requirements checklist.

Form Validation Project

- Built a client-side form validation system to prevent empty or invalid user inputs.
- Used JavaScript to validate form fields and display dynamic error messages.
- Improved overall form usability by guiding users with clear and responsive validation feedback.

PHP-Based Web Application

- Built a dynamic web application using PHP and MySQL for backend functionality.
- Implemented user authentication, data storage, and CRUD operations.
- Designed intuitive frontend interfaces with HTML, CSS, and JavaScript.
- Gained hands-on experience integrating backend logic with responsive frontend design.

Professional Experience

Frontend Developer (Learning & Collaboration)

Amidrah AI Startup | August 2025 – Present

- Contributed to frontend development tasks using HTML, CSS, JavaScript, React and typescript.
- Assisted with implementing login and password-related features, including input validation and basic authentication UI flows.
- Integrated frontend forms with validation logic to enhance data accuracy and user experience.
- Collaborated with team members to understand requirements and deliver assigned features.
- Gained practical experience working on real product features while learning frontend development best practices.

IT / Web Development Trainee

Personal and Academic Projects | July 2025 – August 2025

- Built small frontend applications to strengthen JavaScript fundamentals and problem-solving skills.
- Used Git and GitHub to manage source code, track changes, and document development progress.
- Debugged and resolved common frontend issues related to forms and user input handling.

Education

Usmanu Danfodiyo University | Sokoto

B.Sc. Computer Science | October 2021 – December 2025

Languages

- English – Professional Proficiency
- Hausa – Native

Additional Skills

- Basic computer troubleshooting
- Clear technical documentation and report writing
- Strong willingness to learn and adapt quickly
- Ability to work effectively both independently and within a team
